3RD NOTEBOOK SECTION -- VASES PHOTOGRAPHS NEEDED BY JANUARY 31, 1998

The first two vase sections of the HOACGA Notebook have been completed, thanks to the help of many members. The vase information has been received very well. It is very useful information for all collectors.

I am now in the process of assembling the necessary photographs for the third Vase section of the Notebook. The first two sections covered the pattern names which started with the letters A through G. For this third section, it is planned to add those vases whose pattern name starts with H through P (Hand Vase through Pulled Loop). I presently have a photograph of several of the patterns, but there are some for which I need a photograph. These patterns are listed below. If you have one of these vases, any unusual, or unknown vase, and would be willing to photograph it, I would appreciate your sending me a picture. It will be a great help in providing useful information to all collectors. The more information that is received, the more complete the Notebook section will be.

EDUCATIONAL TUMBLER SERIES

By John & Lucile Britt

ROYAL DIAMONDS TUMBLER

The Royal Diamonds is a very pretty tumbler in good medium marigold with very nice iridescence. I have had no luck in finding the maker of this tumbler. We know that it came from England, but that does not mean that it was made in that Country. It is possible that it was made by Inwald, Brockwitz or Riihimaki, but at the present time we can only safely state "Maker Unknown".

The tumbler is 3 3/4 inches high and has a top opening of three inches. It flares in at the base to 2 1/8 inches in diameter. The outer 1/4 inch edge of the base has been ground and polished. The rest of the base to the center is depressed about 1/4 inch and is perfectly smooth. There is a plain one inch wide band at the top of the tumbler. The area below this band is filled with rows of diamonds with the top and bottom rows being half diamonds.

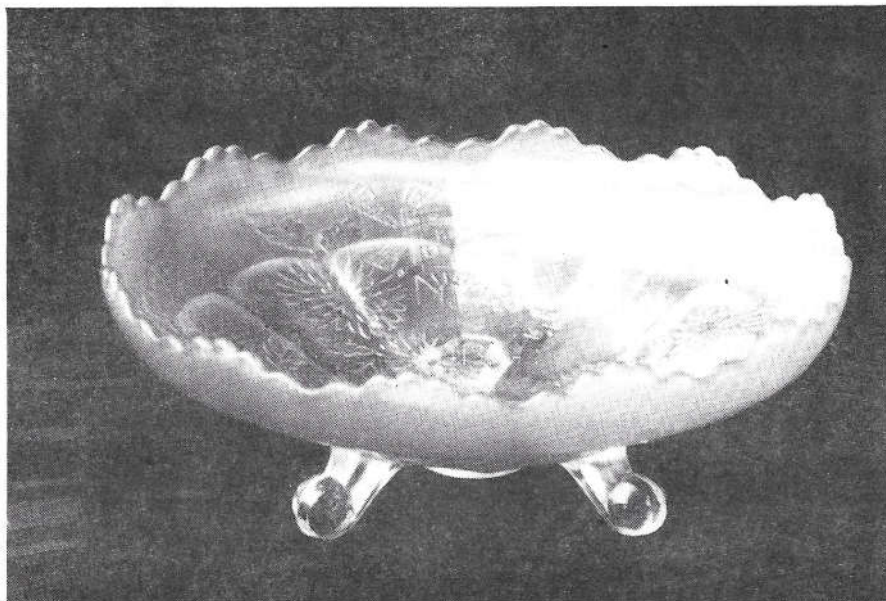

One thing that I especially noticed with this tumbler is that in holding it to a light, the area between the top band and the base is filled with a network of many tiny circles. I believe you can detect this in the photo of the tumbler. In crystal, this is sometimes referred to as thousand eyes. I have seen it in carnival glass. I thought that this was very unusual in carnival glass. Another thing I noted is that it was made with high quality glass and workmanship. We will continue searching for the making of this pretty tumbler. The photo is courtesy of Dave Doty.

This article on the Royal Diamonds tumbler marks our 240'th entry into the Educational Tumbler Series. Next month we will feature the Catawba tumbler.

WHITE CHRYSANTHEMUM BOWL

By Alan & Lorraine Pickup

Fenton's Chrysanthemum bowls can be found in two sizes, at least two shapes and various colors. The pattern consists of eight large flowers, presumably Chrysanthemums with foliage, all intermingled with spruce trees, buildings, sailboats, and two large windmills.

The larger 10 inch, three toed or ball footed version is usually found in marigold, blue, and an occasional green. Other colors reported are vaseline, amethyst, and black amethyst. Add to the list this seldom seen white. Pictured in the December 1993 I.C.G.A. color insert is a picture of Don Moore's "so-called" black amethyst bowl. His comment was, "Like most other pieces in this color that I have seen, it is a deep purple when strong light is forced through it."

The Chrysanthemum pattern first appeared in the Butler Brothers wholesale catalogs in April of 1913. It is advertised in a bowl assortment in "Golden and Royal iridescent". (marigold and blue?) The exterior pattern on the large bowl has twelve wide panels arranged around a small 1½" marie, supported by three paneled ball feet.

Some of the large Chrysanthemum bowls are found in both ruffled and ice cream shapes. We have only seen one other large white ice cream shaped bowl and have heard of another damaged bowl seen in Texas. Whether or not the large white bowl was also made ruffled is unknown to us. Of course, some colors may or may not be found in both shapes. The ruffled bowl will measure slightly more due to its shape.

The smaller 9" collar base version can be found in amethyst, blue, marigold, teal, green, red and possibly white. The bowls we have seen were all ruffled. The Bill Edwards' small Fenton book published in 1981 by Collector Books shows a picture of a beautiful marigold ruffled bowl with spade feet, but doesn't give any indication of size. The pictured bowl appears to have no reverse pattern. We will guess that it is the small 8" to 9" bowl, as Fenton made other 8" - 9" bowls such as Stag & Holly and Two Flowers in the spatula footed configuration.

The top edge carries a saw tooth type fluting on both the large and the small bowls. In addition, the edge flutes are also undulating on the large bowls. (See picture) Bill Edwards' small book, "Fenton Carnival Glass, The Early Years", also mentions an ice green bowl. No, we have not seen one as yet but will keep looking.

THE NEW CHRISTMAS COMPOTES

By Alan & Lorraine Pickup

A blessing or a curse? We know many of you ardent collectors are already familiar with this story, but for those who are a little behind the curve we will attempt to bring you up to speed. As reported in the October/November issue of the *Glass Collector's Digest*, three men, all glass addicts devoted to promoting glass collecting, were on a treasure hunt on a cold January day in an "old warehouse" full of hundreds of old glassmaking moulds. Now this sounds like a scenario that many of us would love to be in. Well, maybe not in an unheated warehouse on a cold day in January. And it is noteworthy that the warehouse location was not in the story. The three men were Dr. James Measell, glass researcher, Dave Richardson, glass digest publisher, and Bud Ward, a retired Fenton glass foreman.

The bottom line to this tale was that the Christmas compote mould was found and it had the Dugan Glass Company D in a diamond logo stamped on it. So another glass "who made it" mystery was solved. It was also determined that the

mould was fit to make glass again and Dave Richardson arranged for Fenton Art Glass to do just that. In June of 1997, the Christmas compotes were made again. Fourteen in mulberry blue, three teal and one topaz opalescent. Most of these compotes were sold at the International Carnival Glass convention in Dayton, Ohio last August. The topaz opal was saved for display at the Glass Press offices in Marietta, Ohio. These compotes are reportedly signed with the block letters G P for Glass Press and a stylized *F* in an oval for the Fenton Art Glass Company.

Since then compotes were made and sold in Ruby glass with satin finish (111) and radium finish (188) and more in topaz opalescent (152), almost all of which were first quality. Seconds were also sold in ruby glass. These compotes are signed A P for Antique Publications and the *F* within the oval. And there are plans to make some, possibly a couple of hundred, in green at some future date.

These has been mixed reaction to the remaking of these compotes. Some collectors are very unhappy, feeling it will hurt the price of old compotes. Some of us are glad for the opportunity to own a new Christmas compote. These compotes are not being made in the colors of the original compotes, marigold and purple, and should pose no threat to the value of the old ones. It could make the old ones even more desirable. We will have to wait and see on this. Certainly the Loganberry and Poppy Show vase prices are not very depressed today because of the I/G reissue.

A short video tape was made showing these new compotes being made at the Fenton factory with the old hand side-lever press. We were lucky enough to tour the factory some years ago and the tape was a great reminder of that trip. We could feel the heat and hear the furnaces roar again while viewing this tape. A visit there is a must experience for all carnival glass collectors. And standing in the background looking like proud parents overseeing the work are Frank Fenton, Jim Measell and Dave Richardson. A very enjoyable tape, guys. And a big thank you to the expert glass workers shown plying their trade, as well as the producers of the video.

COMMENTS ON SOME NORTHWOOD REVERSE PATTERNS

By JoEllen & Tom Rotondi

(This article appeared in the February, 1987 HOACGA bulletin)

In January, 1987, we ran a "Want Ad" in the HOACGA Bulletin asking for plates and bowls with unusual exteriors in the Northwood Peacocks and Hearts & Flowers patterns. Although no one offered us anything for sale, a few people called to ask what we know about the incidence of these exterior patterns. The answer is not very much, but we would be glad to share what we've found out with you.

HEARTS & FLOWERS WITH BASKETWEAVE EXTERIOR - one purple ruffled bowl.

HEARTS & FLOWERS WITH PLAIN EXTERIOR - one white ruffled bowl; one ice-green plate.

PEACOCKS WITH BASKETWEAVE EXTERIOR - one marigold ruffled bowl; one green piecrust bowl; one white plate.

PEACOCKS WITH PLAIN EXTERIOR - one white piecrust bowl; two white ruffled bowls; two white plates; three ice-green plates; one dark green plate.

The Hearts & Flowers compotes were made with both the ribbed and plain exteriors. We have not seen enough of these compotes to make any generalization as to whether one exterior is actually more scarce than the other. To date, we have seen the plain exterior on white, ice-blue, ice-green, and aqua opalescent compotes. The ribbed reverse pattern has been seen on all familiar colors except ice-green.

Peacock's bowls and plates can also be found with a stippled interior pattern. It appears that most of these stippled pieces were made in marigold and blue, although we have seen one stippled ruffled bowl in purple and one in green. Without exception, though, every stippled Peacocks piece that we've seen has had the ribbed exterior. If you have stippled Northwood Peacocks with either basketweave or plain exterior, you probably have a rare item indeed!

If any of you have information to add to the data, please send your information to Bob Grissom, 7517 Evanston, Raytown, MO 64138. I will pass the information to the Rotondi's and we will add the information to this article and reprint at a later time.

RARE NORTHWOOD REVERSE PATTERNS

By JoEllen & Tom Rotondi

(This article also appeared in a 1987 HOACGA bulletin)

In the February, 1987 issue of the HOACGA bulletin, we asked readers for additional information regarding the rare basketweave and plain exteriors in the Hearts & Flowers and Northwood Peacocks patterns.

We wish to sincerely thank those of you who took the time to share your knowledge with us, including Ed Binstock, John Britt, Peggy Bullard, Marie Capps, William Coles, Donna Courts, Harold Cox, Norene Duran, Bev Franzen, Nigel Gamble, Bruce Hill, James Key, Mildred Markley, Dale Matheny, Don Moore, and Elvis Randall. Special thanks go to Lamer Sharp, who provided us with a description of every item in his Peacocks collection.

Listed below is a summary of the bowls and plates that were reported to us by other collectors. These reported items do not duplicate anything that was listed in our first article (February, 1987 HOACGA bulletin). If you are keeping a tally, therefore, please add the following items reported by collectors to the ones already mentioned in our first article:

HEARTS & FLOWERS, BASKETWEAVE EXTERIOR - one purple ruffled bowl.

HEARTS & FLOWERS, PLAIN EXTERIOR - one ice-blue ruffled bowl; one ice-green piecrust bowl.

PEACOCKS, NON-STIPPLED, BASKETWEAVE EXTERIOR - one marigold ruffled bowl; one marigold piecrust bowl; one green ruffled bowl; one green piecrust bowl; two white plates.

PEACOCKS, NON-STIPPLED, PLAIN EXTERIOR - one ice-blue ruffled bowl; one white piecrust bowl; one dark green plate; three ice-green plates; five white plates.

When considering the recent input furnished to us, it appears that the basketweave and plain exteriors in the Hearts & Flowers pattern are much more difficult to find than in the Peacocks pattern, especially in plates. This would seem to be reasonable. We have compiled empirical data suggesting that Northwood originally made many more items in Peacocks, as compared to Hearts & Flowers (possibly a 3 to 1 ratio for bowls, and a 9 to 1 ratio for plates).

We would like to close with a trivia question for all of you super sleuths out there. Did Northwood ever make a Hearts & Flowers piece that was trademarked

with their famous N? In her Carnival Glass in Color book, Hartung states specifically that Hearts & Flowers "has been found with the N trademark." We have never seen one. Have you?

With reference to JoEllen & Tom Rotondis' article on "Reverse Patterns" and "Trivia Question" on Hearts & Flowers trademarks, we would like to report the following:

We have seven different piecrust edge Hearts & Flowers bowls. Of these, the ice-green and white are clearly marked with the circled (N), under the collar base. The marking is slightly raised and can be felt as well as seen. The marigold, dark blue, ice-blue, dark green and purple bowls show no trace of this mark. Interestingly, our white and ice-green ruffled bowls are not marked. It is possible that in view of the low relief of the mark, the movement of the bowls over the years may have obliterated the mark, depending on the slight convexity or concavity of the base. Marked or unmarked, we are crazy about these seven bowls!

THE 1998 BRITT AWARD IS ANNOUNCED

By Cliff Ball and Ed Kramer

The John and Lucile Britt Award is presented annually to individuals or couples who have made outstanding contributions to the world of Carnival glass collecting.

John & Lucile Britt, Floyd and Cecil Whitley, Carl & Fern Schroeder, Chuck and Marge Kremer and Marie McGee have all received this prestigious award since it was established in 1993. In this, our 25th anniversary year, and the 5th anniversary year of the award, your HOACGA Board of Directors has voted this honor to Bob and Imogene Grissom and in memory of Rosa Grissom.

Bob & Imogene are well known to many of you. They have attended conventions throughout the country and Bob has made presentations at several club conventions including HOACGA. Since their marriage in 1994, Imogene has accompanied and supported Bob in his nearly full time activities to further and promote our hobby. Her career as a teacher and guidance counselor has made her a people-person and it is clear she loves the carnival glass family. She and Bob have hosted several local meetings and presentations as well as an open house during the 1996 HOACGA Convention. Bob has served as president from 1973 to 1975 in the early days of the club and from 1985 to the present. He has spent countless hours in convention planning and other administrative HOACGA duties. He has been the main coordinator of the HOACGA Pattern Notebook, an eighteen year project. Members provide pictures of each pattern of the items selected yearly, and this begins the detailed process of identifying makers and colors, proofreading and printing. This is a one-of-a-kind resource for collectors and is unique to HOACGA.

We recognize as well, the significant contributions to HOACGA of the late Rosa Grissom, Bob's first wife, who passed away in 1991. Bob and Rosa were early members of HOACGA beginning in 1973 shortly after its founding in 1972. Rosa's dedication to HOACGA is well known, and she participated actively in HOACGA's development over the course of nearly 20 years.

We are certain that John & Lucile Britt will welcome these latest recipients to the elite company of those who share this special honor.

PICTORIAL PATTERN PARADE

By John & Lucile Britt

ROSALIND TALL COMPOTE IN BLUE

This extremely rare tall Millersburg Rosalind compote in blue was found by Rick and Bonnie Boldt of California. It was found in an antique shop for the price of \$50.00. They didn't know the pattern, but they bought it anyway and took it home and looked up the pattern, but couldn't find anything about blue in the Rosalind pattern. They then called a Millersburg collector friend, and this to this friend, it sounded like the real thing. They later took it to the Southern California Carnival Glass quarterly meeting. All the members in attendance were very excited about this great find. To the best of my knowledge, this is the only one that has ever been found in blue.

In the above photo, we show the tall Rosalind compote in green alongside the shorter example in amethyst. These tall compotes are almost 9" tall and have a nine sided foot. Each of the sides represents a panel that extends from the very outside of the base up the stem and bowl to the very top of the compote. In contrast to this one, the base on the smaller example is round and smooth. This size is 6" tall. The tall compote in green has the radium iridescence.

We purchased the tall green Rosalind compote from Mr. Hagen of Kentucky while at the 1988 I.C.G.A. convention at LaCrosse, Wisconsin. The price was \$1,750.00 We later sold it to Bob Allaire in April of 1991 for \$2,200.00 This super radiant green compote sold for \$4,500.00 at the Allaire auction held at the H.O.A.C.G.A. convention on April 27, 1996. The photo of the rare blue Rosalind compote is courtesy of Rick & Bonnie Boldt. We wish to congratulate them on their great find.

This article, featuring the Rosalind compote in blue, is #230 in our Pictorial Pattern Parade. Next month we will cover the pretty X-Ray (Radiance) pattern cruet.

KEEPING AN HISTORICAL RECORD

By Cliff and Jo Ann Ball

Since we began collecting Carnival Glass, we have noticed that many serious collectors keep a mental or written history on many of their better pieces of glass. They can tell you where and when they acquired a particular item and often recite several previous owners. Sometimes they know the amount of money that the piece commanded down through its history.

When we recently purchased a pair of Crucifix Candle Sticks, we asked the sellers to tell us where they obtained them. The story turned out to be interesting... and we thought that you might enjoy reading it as it was related to us:

"The Crucifix Candlesticks, as we were told by the local antique dealer we bought them from, were nailed inside a drawer at the bottom of a cupboard they bought near Newberry, Michigan. They drilled out the nails and found them along with a gun. The dealer called us and we bought them".

We purchased these candlesticks... by write in bid... at the Bruce and Gladys Irish auction in Michigan.

We are sure that some of our fellow collectors have other interesting stories about pieces of their glass. Maybe they will share them with us in future editions of the HOACGA bulletin.

CORRESPONDENCE

Dear HOACGA,

To follow up on cleaning glass (page 14 of the September HOACGA bulletin), to clean my glass, I use Fantastic, a toothbrush for cleaning all crevices in the patterns and a moistened sponge to finish the raised parts. To clean hard to reach areas, as in vases or bottles, I again use Fantastic and add small steel punched blanks, which I ordinarily use in a tumbler to clean toy train parts and shake. Fine stone pebbles or shotgun pellets do fine as a substitute. Keep Polishing!

Dear HOACGA,

Could any HOACGA members help me to a couple of answers to my questions? Are there any clubs out there that specialize in other types of glasses, such as Custard, Opalescent or maybe a maker such as Northwood? I would be pleased to find the addresses of such clubs.

I hope someone can help me!

Dear HOACGA,

Wes Strain passed away November 10th in St. Louis, MO. Wes is survived by his wife Betty, three daughters, one grandchild, and two foster grandchildren. Wes and Betty celebrated their 50th wedding anniversary April 2 of this year.

Wes and Betty were members of several regional and national Carnival Glass associations. Wes had loved and collected Carnival glass since 1970 and was known for his uncommon knowledge of shapes, pieces, and colors in Carnival glass. He was always generous in sharing his knowledge with other Carnival glass collectors across the United States. He will be greatly missed by all of us.

CORRESPONDENCE

Dear HOACGA,

Enclosed is our check for membership renewal. You just can't imagine how much we enjoy the HOACGA bulletin every month. When it arrives, everything comes to a halt until we've read every page. The educational series, auction trail with Chuck, and auction results are fantastic!! Keep up the good work.

H.O.A.C.G.A. CLUB NEWS & GENERAL INFORMATION

The Newsletter is published on the 15th of each month. The Heart of America Carnival Glass Association is a Not-for-Profit organization registered in the State of Missouri.

Members are encouraged to contribute articles for publication in the newsletter and to advertise carnival glass for "sale" or glass "wanted". Articles may be educational in nature or about collecting experiences, or letters of interest to the membership. Other carnival glass organizations may announce their meetings and/or conventions. Auctioneers who are members may announce their future auctions. Members may announce their upcoming carnival glass educational books, price guides, and other pertinent publications; after the initial announcement the information will only appear in the bulletin "Resource Section". All items submitted for publication will be published in the next months bulletin or as soon as possible. The final decision to publish the articles will be made by the Board of Directors. Some articles may be edited prior to publication. Articles of an offensive nature or articles intended to discredit individuals will not be published.

Membership is \$25.00 U.S. & Canada, \$40.00 Foreign per family or individual. All monetary amounts quoted are in U.S. dollars. Membership year starts the month your dues were paid. All checks are to be made payable to H.O.A.C.G.A. and mailed to the Secretary, as listed on the inside front cover. All articles and items for publication in the bulletin are to be sent to the Bulletin Secretary whose name and address appear on the inside front cover.

H.O.A.C.G.A. - CLUB INFORMATION

The purpose of the Heart of America Carnival Glass Association is to promote the growth and continuation of the Carnival Glass collecting hobby and to provide support to the many collectors by providing current information about the hobby.

Growth is accomplished by supplying educational information for the collector and soliciting new collectors into the hobby.

A Convention is held annually in April in conjunction with the annual meeting (Convention date always includes the 4th Friday). Some of the activities provided at the convention are:

- * Members provide Room Displays with glass from their collection.
- * Members are encouraged to bring glass for Sale.
- * Educational Seminars are provided by members.
- * A Major Carnival Glass Auction is provided.
- * The Convention offers members an opportunity to meet new collectors, renew old friendships and enjoy discussing carnival glass with other knowledgeable collectors.
- * A banquet is held with a Carnival Collector as our Speaker.
- * A Hospitality time is provided by the club. This is a time of relaxation and visiting with other members.

It takes the support of all collectors and members to promote the hobby in order that its growth and expansion can continue.

In order to obtain our objective, the members must financially support the organization. The Heart of America Carnival Glass Association receives its financial support through the Annual Membership dues and the sale of the following.

- * **Membership Dues** - \$25.00 per year - U.S. & Canada. \$40.00 per year for Foreign. The Membership Year is from the date of joining to one year later. Dues are set by the Board of Directors to support the

publication of the monthly bulletin, typing, printing and mailing.

- * **Educational Series - Book I** - 148 articles with pictures (black and white) on a variety of Carnival Glass Patterns.

- * **Educational Series - Book II** - 180 articles with pictures (black and white) of Carnival Glass Tumblers

- * **Educational Series - Book III** - 150 articles with pictures (black and white) of Bon Bons, Bowls, Drinking Vessels, Novelties, Rose Bowls, and Table Sets. Also included is a listing of 500 rarities.

- * **Hartung Carnival Glass Pattern Books** - A set of 10 books identifying Carnival Glass Patterns. These books are a must for all Carnival Glass Collectors, especially for the beginner. These are the only complete set of books available that identifies the majority of the carnival glass patterns. Sketches are in black and white.

- * **Pattern Notebook** - A notebook containing sections on Mugs, Table Sets, Rosebowls, Water sets (including painted sets), Plates (small, regular & chop), Compotes (large, regular & small), Punch Sets and Vases. Each section of the notebook identifies each pattern with a **COLOR** picture along with information about the Maker and colors of each different pattern.

- * **Souvenirs** - Periodically H.O.A.C.G.A. makes a souvenir to be sold to members. Souvenirs have been made since 1974, a few of these are presently available. They are the small Good Luck plate in ruby red, the Green Opalescent - Fenton, Cobalt - Millersburg, Marigold - Imperial, and Teal - Dugan Bells. Each year that Souvenirs were made, Whimseys were also made and sold at the convention banquet.

- * **Video Tapes** - Video Tapes of educational programs given during the various conventions are available. A complete listing of the available video tapes are shown on the Order Form, which is part of this section of the Bulletin.

SPECIAL JANUARY 1998
HOACGA MONTHLY MEETING

The January meeting of the Heart of America Carnival Glass Association will be on Sunday, January 25, 1998 at the home of Charlie and Eleanor Mochel, 14611 Eby, Overland Park, Kansas. (Two blocks west of Antioch at 147th St.) Charlie and Eleanor will discuss their wonderful collection of carnival glass. Let's have a great attendance at our first meeting of 1998. We look forward to seeing you there.

Ed Kramer, Secretary HOACGA

IN MEMORIAM

THE LOSS OF A CARNIVAL GLASS GIANT

The Carnival Glass family mourns the loss of a special friend- John Britt died on Thursday, January 8, 1998. Occasionally we are privileged to know such a person as John, who has had a great influence in many ways; not only on us as individuals but also on the hobby of which we all have a common interest.

John's influence will long be remembered for his dedication through the educational articles he contributed to the many organizational newsletters, and especially the "Educational Tumbler Series" and the "Pictorial Pattern Parade" series of articles which were featured each month in the HOACGA Bulletin. He also gave us a "Peek Into The Past" with the different items and prices which he had taken from past price lists and the Antique Traders.

John's Influence has furthered the interest in the hobby through his travels to attend the many conventions where he always had glass on display. John and Lucile were sought after by the many organizations as convention speakers, as such they were very informative. John always willing to discuss and share his extensive knowledge and his time with fellow collectors. He particularly enjoyed sharing information with the newer collector. We will all miss these opportunities and privilege of sharing with this unique individual.

John has left his influence on the world of Carnival through his hundreds of documented articles and video recorded talks. All of the information that he has generated is collected, studied, and will continue to expand the knowledge of the collector.

As a small way of recognizing the Britts for their graciousness, helpfulness, willingness, and dedication in furthering the Carnival Glass interest, HOACGA initiated the on going "JOHN AND LUCILE BRITT AWARD FOR EXCELLENCE IN CARNIVAL GLASS" award. This honor, given in the Britt's name, is to recognize those persons who have made a significant contribution and exhibited an outstanding interest and dedication to the glass of our mutual interest.

Even though John considered the collecting as a business venture, he was one of those unusual individuals that gave of his time willingly and unselfishly in order to encourage and help others in their quest of collecting.

We as collectors, because of the efforts of this man will always be able to "PEEK INTO THE PAST".

**JOHN'S INFLUENCE WAS ENHANCED BY
LUCILE'S INFLUENCE. JOHN YOU WILL
ALWAYS BE REMEMBERED.**

TEXAS CARNIVAL GLASS CLUB

The Texas Carnival Glass Club invites you to leave the boredom and winter weather and join us in Houston for our 19th annual convention and auction on Feb. 19-21, 1998.

Registration and events begin on Thursday with a caravan out for seafood or steak with the tour guiding by one of the officers. The Annual Game Night and Ice Cream Social will follow with prizes and the 1st Annual Story Hour with a Grand prize.

Friday will feature Shirley Stansberry with her educational program on Crider, Hanson, and St. Clair collections with focus on Old vs. New carnival glass.

A buffet will be continued on Friday night followed by previewing of the Saturday auction, and the annual T.C.G.C. Midnight Auction.

Saturday morning the annual Seck Auction will be the main event featuring a major collection of a very special collector.

The annual banquet with special favors and speaker will complete the Saturday activities. Sunday morning will focus on several Open Houses of T.C.G.C. members' homes and their carnival glass collections. Maps will be furnished, or tour leaders available.

Special rate is \$69. per double at the Sofitel Hotel near the Bush InterContinental Airport. Reservations may be made by calling: 1-800-SOFITEL or fax to: (281) 445-9826. State that you are with the T.C.G.C. convention.

Pre-registration is urged and may be done on-site, or Pre-register with Matzi Thrasher at (281)351-2202.

We'll welcome you with a real Texas Howdy and you'll be glad that you joined our fun.

National Imperial Glass Collectors' Society, Inc.

Headquarters
P. O. Box - 534 / Bellaire, Ohio / 43906

A non-profit organization dedicated to the preservation and study of Imperial glassware.

Bellaire, Ohio -- The National Imperial Glass Collectors Society is pleased to announce the release of Volume-II of the Imperial Glass Encyclopedia. This latest installment is one of three comprehensive editions of the reference-style series designed to cover Imperial glass, literally and figuratively "from A to Z."

For 80 years the Imperial Glass manufactory in Bellaire, Ohio was a leader in the hand-crafted glass industry in this country. This compilation of written and visual reference is a tribute to the artisans responsible for creating these radiant products and an invaluable guide for the collector.

The roots for this series began with the National Imperial Glass Collectors Society whose goals are to understand and preserve the history of the Imperial's products, industry and people. "Education and awareness of what Imperial was all about are our goals. These encyclopedias bring us closer to our ultimate destination of establishing a National Imperial Glass Museum. Many, many of our members have invested a lot of time and effort in this project. We owe a tremendous amount of gratitude to them, Dr. James Measell and to the people at The Glass Press for helping us bring this dream to reality," said NIGCS President, Kathy Doub.

Editor of this series, Dr. James Measell, has again used his exceptional skills as a glass research-historian, combined with his unique gift of communication, to make the Imperial Glass Encyclopedia Volume-II (Cape Cod to L) not only factual, but "interestingly descriptive" as well. Published by The Glass Press, Inc. of Marietta, Ohio, this 274-page compendium of Imperial's products contains 80 color pages plus numerous black & white photos, including many original diagrams, catalog excerpts and advertisements.

While Volume-I (A-Cane) includes such popular glassware lines as Candlewick, Art Glass and Animal figurines, to name only a few, Volume-II continues with Cape Cod, Caramel Slag, Carnival, Cathay, Free Hand, Lead Lustre and many, many other subjects. Each volume contains a comprehensive Index that is fully cross-referenced and encompasses "colors, item designations, pattern names and any other terminology (whether technical or popular) deemed important for an understanding of Imperial glass" plus a Value Guide.
